

Tech Logic offers new FEIG Electronics security gates

WHITE BEAR LAKE, Minn. (Jan. 12, 2010) – Tech Logic now offers newly designed FEIG Electronics Radio Frequency Identification (RFID) security gates that have individual design characteristics to meet the most critical needs of architects.

Gate antennas protect against theft and can be sited in various areas of a library, including entrances and exits, corridors, and staircases. The new security gates are smartly designed to meet the demands of modern architecture, making them attractive attributes in modern and traditional libraries. The gates, which include automatic tuning, permanent function monitoring, and automatic diagnostics, are available in three new designs with powerful 3-D reading performance:

- **Solid Gate** – this elegantly designed gate, with high material integrity and an intelligent system structure, is easy to assemble.
- **Clear Gate** – this attractive gate is material-efficient and easy to handle, and has an integrative system structure.
- **Crystal Gate** – this transparent gate has an innovative design that makes it visually striking and stable, without the need for additional frame components. It is easy to assemble and has orientation-neutral mounting.

To learn more about the RFID security gates or Tech Logic's other products and services, contact Gary W. Kirk at gwkirk@tech-logic.com, 800.494.9330, or visit www.tech-logic.com.

About Tech Logic

Tech Logic is the leading provider of innovative Automated Sorting Technologies (AST), circulation staff support tools, and patron self services for libraries. Tech Logic offers unequalled expertise, dedication to quality, and world-class customer support services.

Tech Logic provides barcode and RFID check-in and checkout systems, material return drops, AST systems, inter-library distribution systems, and patron reserve systems. Tech Logic designs, manufactures, delivers, installs, maintains, and services all of its systems.
